The image shows a custom-built electronic device, possibly a portable power source or a sensor module. It consists of a green PCB with a black battery pack attached. The PCB is populated with various components, including a small LCD display, a microcontroller, and several passive components like resistors and capacitors. The device is connected to a red and black cable with a white connector. The PCB has several labels and markings, including "LPC1114", "P338E", and "P338E". The device is shown against a blue background.
